Abdulqader Alshihabi

Software Engineer | Backend & Full-Stack Development

Madinah, Saudi Arabia | +966 58 273 3968 | abdulqader.moh.2003@gmail.com

LinkedIn: linkedin.com/in/abdulqader-alshihabi-859b19260 | GitHub: github.com/Abdulqader-Alshihabi | Portfolio: abdulqader-alshihabi.github.io

PROFESSIONAL SUMMARY

Computer Science student graduating in January 2027, with practical experience developing backend systems, full-stack applications, and AI-powered data processing solutions. Experienced in Python, Django, React, TypeScript, and PostgreSQL, with hands-on contributions to research information systems and enterprise software workflows.

TECHNICAL SKILLS

Programming Languages: Python, TypeScript, JavaScript, SQL, Java

Backend Development: Django, Django REST Framework, RESTful APIs, Role-Based Access Control (RBAC), Supabase

Frontend Development: React, Next.js, TypeScript, HTML5, CSS3, Tailwind CSS

Databases & Data: PostgreSQL, PL/pgSQL, Supabase, SQLite, Database Design, Vector Embeddings

AI & Machine Learning: PyTorch, Scikit-learn, Sentence-Transformers, LLM Integration (Ollama), NLP, Pandas, NumPy

Tools & Platforms: Git, GitHub, Docker, Linux, Postman, WebSockets

WORK EXPERIENCE

Research & Innovation Consultant (Part-time) **Jul 2026 – Nov 2026**

Institute of Research and Consulting Studies, Islamic University of Madinah | Madinah, Saudi Arabia

- Engineered a locally hosted LLM extraction pipeline using Python, Ollama, and Qwen to process unstructured Arabic research documents and convert them into structured schemas, reducing reliance on third-party cloud APIs.
- Implemented robust data validation, Arabic text normalization, retry mechanisms, and transactional database writes to ensure deterministic processing of inconsistent source documents.
- Organized researcher profiles and domain expertise by generating vector representations with multilingual Sentence-Transformers and clustering techniques, designing optimized PostgreSQL schemas for vector and relational queries.
- Collaborated with the platform engineer to deliver research analytics for the commercialization engine and prepared technical progress reports and milestone presentations for university leadership.

Software Engineer Intern **Jun 2026 – Jul 2026**

Asaqefah for Business Development | Saaed HR & Payroll ERP | Madinah, Saudi Arabia

- Contributed to Saaed, an integrated HR and Payroll ERP developed to connect previously disconnected HR, payroll, and finance workflows across departments.
- Developed core backend services with Django REST Framework and interactive frontend views with React and TypeScript on a PostgreSQL database.
- Automated the transfer of approved payroll calculations into Finance general ledger accounts, replacing error-prone manual handoffs between departments.
- Implemented role-based access control (RBAC) and strict server-side validation rules to secure sensitive employee records and maintain transactional consistency across cross-departmental workflows.

PROJECTS

Islamic University CRIS – Research Information Management System (Graduation Project) | Case Study & Repository

Technologies: React, TypeScript, PostgreSQL, PL/pgSQL, Supabase, Scopus API, OpenAlex API

- Built a centralized research intelligence platform that ingests, cleanses, and reconciles academic publications from Scopus and OpenAlex APIs, resolving fragmented research records.
- Designed automated ETL pipelines in PostgreSQL and PL/pgSQL featuring multi-field deduplication algorithms to eliminate duplicate entries and maintain author-paper attribution accuracy.
- Developed interactive analytical dashboards and administrative review workflows for institutional research tracking, quartile analytics, and publication verification.

Shakkel Learn – Corporate Learning Management System | Live Platform: learn.shakkel.store

Technologies: React, TypeScript, Supabase, Tailwind CSS, Tiptap Editor

- Engineered a multi-tenant corporate learning platform featuring bilingual (Arabic/English) interfaces and granular role-based permissions for administrators, instructors, and learners.
- Implemented rich interactive course authoring using Tiptap editor, automated timed assessment evaluations, verified certificate issuance, and HR completion analytics.
- Architected PostgreSQL row-level security (RLS) policies and state-driven assessment engines to enforce data isolation and prevent unauthorized assessment access.

Shakkel Store – B2B Industrial Supplies Platform | Live Platform: shakkel.store

Technologies: React, TypeScript, Supabase, PostgreSQL, WebSockets

- Developed an e-commerce platform for industrial packaging and supplies, streamlining supplier-buyer interactions through structured product filtering and dynamic quotation generation.
- Implemented an automated Request for Quotation (RFQ) engine that computes custom pricing with VAT calculations, replacing manual phone and email estimate cycles.
- Integrated WebSockets for real-time order event broadcasting, instant quotation status updates, and support ticket notifications for operations staff.

EDUCATION

Bachelor of Science in Computer Science **Expected Graduation: January 2027**

Islamic University of Madinah | Madinah, Saudi Arabia

Relevant Coursework: Data Structures and Algorithms, Database Systems, Software Engineering, Artificial Intelligence, Machine Learning, Deep Learning, Operating Systems, Computer Networks

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

- **Advanced Artificial Intelligence (Computer Vision) –** KAUST Academy & Universidad Politécnica de Madrid (2026)
- **Introduction to Artificial Intelligence (with Distinction) –** KAUST Academy & Universidad Politécnica de Madrid (2026)
- **KAUST Academy AI Specialization Selection –** KAUST Academy & Islamic University of Madinah (2026)
- **Asaqefah SandBox Innovation Program –** Asaqefah & Amazon Web Services (AWS) (2026)
- **Introductory Artificial Intelligence Program –** KAUST Academy & NTDP (2025)
- **Improving Deep Neural Networks: Hyperparameter Tuning, Regularization and Optimization –** DeepLearning.AI (2024)
- **Mathematics for Machine Learning: Calculus, Linear Algebra, and Probability & Statistics –** DeepLearning.AI (2024)
